

Paul Krogmeier

1010 W University Ave, Urbana, IL, 61801

📞 +1 765 404 6297 • ✉ paulmk2@illinois.edu • 🌐 paulkrog.github.io

Pursuing a PhD in computer science from the University of Illinois at Urbana-Champaign.

Education

Graduate

University of Illinois at Urbana-Champaign <i>PhD Computer Science</i>	Urbana <i>2018–present</i>
Purdue University <i>M.Eng. Computer Engineering, GPA: 3.99</i>	West Lafayette <i>2016–2018</i>

Undergraduate

Purdue University <i>B.S. Computer Engineering, GPA: 4.0</i>	West Lafayette <i>2012–2016</i>
EAFIT University <i>Study Abroad, Compilers and Operating Systems courses</i>	Medellín, Colombia <i>Spring 2015</i>

Publications

Decidable Synthesis of Programs with Uninterpreted Functions. Paul Krogmeier, P. Madhusudan, Umang Mathur, Adithya Murali, Mahesh Viswanathan. Under submission. Preprint.

Deciding Memory Safety for Forest Data Structures. Umang Mathur, Adithya Murali, Paul Krogmeier, P. Madhusudan, Mahesh Viswanathan. Under submission. Preprint.

Krogmeier, P. M. and Kidd, S. and Delaware, B. Towards Context-Aware Data Refinement. Fourth International Workshop on Coq for Programming Languages, January 2018.

Experience

Illinois Programming Languages and Formal Methods <i>Research Assistant (advised by Madhusudan Parthasarathy)</i>	Urbana, IL <i>Aug 2018–present</i>
<ul style="list-style-type: none">Exploring synthesis and verification problems for entirely uninterpreted programs over infinite data domainsLearning algorithms for first-order logic concepts: seeking tractable classes of formulae for which online learning has a polynomial mistake bound	
Purdue Programming Languages Group <i>Research Assistant (advised by Benjamin Delaware)</i>	West Lafayette, IN <i>Aug 2017–Jul 2018</i>

- Modeled the syntax and semantics of the Fiat specification language with a deep embedding in the Coq proof assistant.
- Developed a mechanized proof of Fiat's type safety.
- Formalized a logical relations proof strategy for validity of refinement from Fiat specifications to implementations.

Purdue University ECE Department

Discrete Math Teaching Assistant–ECE 369

West Lafayette, IN

Aug 2017–Dec 2017

- Verified reference exam solutions and graded student exams.
- Organized weekly office hours and help sessions.

Purdue University – Machine Learning for SAT

Research Assistant

West Lafayette, IN

Jan 2017–May 2017

- Studied the source code for the MiniSat SAT solver.
- Implemented online thompson sampling algorithm to learn reward function over SAT variables.
- Tested usefulness of the extension against plain MiniSat.

Purdue University – E-Lab

Student Programmer

West Lafayette

Sep 2016–Dec 2016

- Programmed Torch7 CNNs to solve image classification problems.
- Experimented with RNNs to study problems in speech recognition.

APOLO Scientific Computing Center

Programming Internship

Medellín, Colombia

May 2016–Jul 2016

- Developed software to produce client usage reports for a Linux Rocks cluster administrative team.
- Wrote and debugged Python scripts to generate reports on cluster load and usage characteristics. This involved learning the APIs for the TORQUE and SLURM resource management tools.
- Met weekly with development team to discuss progress.

Purdue University – Open Ag Data Alliance

Embedded Systems Programmer

West Lafayette

May 2014–Jul 2014

- Developed C code for a wireless, embedded semi-truck weight sensing application.
- Interfaced Nordic system-on-chip to air pressure sensor over I²C.
- Programmed communication between Android app and system-on-chip using Bluetooth Low Energy stack.

Invited Workshops

Dagstuhl Seminar on Logic and Learning

Invited Junior Researcher

Schloss Dagstuhl, Germany

Sep 2019

The goal of this seminar was to explore ways of combining logical knowledge with learning systems like neural networks.

Summer Schools

SRI Formal Methods Summer School

Student Participant

Atherton, California

May 2019

- Experimented with EasyCrypt for Coq proofs security for cryptographic protocols.
- Experimented with the Viper verification language for proving properties of heap-manipulating programs.

Oregon Programming Languages Summer School

Student Participant

Eugene, Oregon

Jun 2017

- Experimented with dependently-typed Idris and with programming language semantics modelling in PLT Redex.
- Attended research lectures from experts in programming languages and formal methods.

Coursework

Graduate

MA 570 – Mathematical Logic
 MA 511 – Linear Algebra with Applications
 CS 477 – Formal Software Development
 CE 642 – Information Theory and Source Coding
 CE 573 – Compilers and Translator Systems
 CE 608 – Computational Models and Methods
 CE 600 – Probabilities and Random Processes
 CS 565 – Programming Languages
 CS 590 – Artificial Intelligence and Causal Inference
 CS 584 – Theory of Computation and Complexity
 CS 573 – Data Mining

Undergraduate

CE 368 – Algorithms and Data Structures
 CE 369 – Discrete Math
 CE 364 – Python and Bash Scripting Lab
 CE 337 – ASIC Design Laboratory
 CE 437 – Computer Architecture
 CE 477 – Digital Systems Senior Design

Skills

- **Programming Languages:**
 High proficiency: Ocaml, C/C++, Python
 Medium proficiency: Haskell, Prolog, Java, Matlab, Verilog
 Basic exposure: Idris, Racket, x86 ISA, MIPS ISA, Lisp, Jekyll/HTML/CSS
- **Research Software:** Coq, Rosette, Sketch
- **Natural Languages:** Fluent in Spanish, German, and English (native)

Awards and Honors

- **UIUC Wing Kai Cheng Fellowship:** August 2018
- **Purdue Ross Fellowship:** May 2016
- **Phi Beta Kappa:** May 2016
- **Graduated “with highest distinction” (top in class, Purdue ECE):** May 2016
- **100K Strong in the Americas Scholarship:** August 2014
